1. All Mindray Automated External Defibrillators conform with the Australian Resuscitation Council Guidelines 2016 (many AEDs do not).
2. All Mindray AEDs have escalating energy which gives difficult to defibrillate patients a better chance of survival.
3. More emergency medical professionals use Mindray defibrillators
4. If you are committed to investing in a life saving device (AED), ensure you invest in the most effective device on the market that is the easiest to use in such a confronting situation. Give your friends, colleagues or loved ones that best chance of survival - choose a Mindray device.
